Wrapping Up The IHP Analog Certificate Course 2026

Phillip Ferreira Baade–Pedersen (Design Engineer)
Erlangen - 24/02/2026

Projects: BMBF -> FMD-QNC (16ME0831)

Unfinished Business

- 0 Spend some time on clarifying issues/questions from the last couple of days, we are available
- 0 Play around 😊

Questions To Answer:

- 0 **Were you challenged in this course:** both in good and bad ways, was it too hard?
- 0 **Enough content:** Was there too much, and how was the quality?
- 0 **How was the structure:** Do you feel that the modules got a bit too superficial or is it nice to come around a lot of different parts?
- 0 **Workload:** Do you feel that the workload was to high, and wanted more demonstration rather than DIY?
- 0 **Changes:** What should we leave out or include for further development? (Designs, flows, simulations etc...)
